

Grand Rapids Michigan- July 23, 2020 - Global IFS is very pleased to announce that it has acquired Magna-Lock Finishes, the leading magnetic backed finish flooring company. Global IFS will fully integrate Magna-lock Finishes into their portfolio of products to help both companies accelerate their growth within the Raised Access Flooring market.

“Bringing Magna-Lock into the Global IFS raised access floor family is a natural and winning combination” said Charley Brown CEO of Global IFS. “This will allow us to further address a wide array of specialized finish needs of the Architect and Design community.”

Magna-Lock Finishes have been installed in many high-profile projects over the past couple of years, proving the need in the market. The Magna-Lock magnetic backed products allow for design freedom, providing a wide variety of floor coverings ranging from wood to terrazzo to LVT, all with many different color and finish options. Importantly, this impressive design flexibility now comes without sacrificing accessibility of the raised access flooring system.

During the coming months, the integration of Magna-Lock finishes into Global IFS will begin. This includes moving manufacturing into the Global IFS plant near Grand Rapids, Michigan. By joining forces with Global IFS, the Magna-Lock product line will now have much broader reach through Global’s sales and marketing teams, providing many additional avenues for growth.
